

Janhvi Redkar

Dear Mr./Ms

I would like to apply for a Developer position with great interest. I heard about this position from social media and job search engine website (LinkedIn, Indeed).

Since last year I have been working as an application developer and got an opportunity to work with an application to start to finish and was able to contribute from initial requirement gathering to design, coding, testing, documentation and implementation. I have worked with an off shore team on a daily basis and therefore honed my communication skills. My technical expertise includes cross-platform proficiency (Windows, Unix, Linux); fluency in multiple scripting/programming languages (including VB, C# and SQL); and an advanced knowledge of UI development using HTML, CSS, Javascript and Angular JS.

My resume is enclosed within the application and I would love to communicate with you regarding the opportunity. You can contact me anytime on my Phone number i.e. 972-876-6855 or you can email me at [janhaviredkar@gmail.com](mailto:janhaviredkar@gmail.com). Thank you for giving me your time and will look forward to talk to you.

Sincerely,  
Janhvi Redkar
